ROTARY FAMILY HEALTH DAYS
(RFHD) PROGRAM
NIGERIA
FEBRUARY, 2023

PROGRAM MANAGER : PDG BOLA OYEBADE

DATE: 2 FEBRUARY – 4 FEBRUARY 2023

Highlights

- Launch Sites as
 - National Launch in Lagos,
 - District launch in
 - Port Harcourt, Rivers State

- 110 Health Day Sites were set up across Nigeria
- Over 114,000 people visited the various sites
- Over 27,791 General pharmacies provided in total
- 41,587 HIV Test performed
- 24,100 Hepatitis B&C screening
- 48,483 Malaria screening
- 54,294 Blood pressure tests
- 1,190 Tuberculosis screening
- 11,596 Prostate screening
- 27,374 family counselling
- 20,633 Polio immunizations administered
- 15,680 Sanitary pads for girls distributed
- 21,289 Vitamin A supplements
- 26,898 Children received deworming
- 21,730 Long-Lasting mosquito nets distributed
- 22,706 Male and Female Condoms distributed

Executive Summary

The February 2023 Rotary Family Health Days was the second being held in the Rotary year 2022 – 2023, the first being in October 2022. This is happening for the second time we are having the program being funded solely by an organization other than Rotary. The funding has created opportunity for the program to be held more than just one time in the year. As a result more people are being reached in more locations. The popularity of the program has also increased. The program which was held across the four Rotary International districts in Nigeria viz, Districts 9110, 9125, 9141, and 9142 witnessed more acceptance by the people of various communities.

HISTORICAL BACKGROUND

Rotary Family Health Days began in Nigeria with the 2012 event which was held in Lagos State on 1st and 2nd June 2012 and in Ogun State on Saturday June 9, 2012. The 2013 event took place in Lagos State local government areas and in Ogun State at Abeokuta, Sagamu, Isara and Ijebu- Ode on May 11, 2013 and another round in Abeokuta on May 17, 2013. The RFHA board agreed to the scaling up of the programme in Nigeria in 2014 to cover the whole country. Consequently, all the then three Rotary districts in Nigeria-D9110, D9125 and D9140 held health camps in their various communities on April 24- 26, 2014. The outcome was good and showed that the decision to cover the entire country of Nigeria was a wise one. In 2014 Nigeria recorded 140,856 attendance; 90,875 in 2015 and 140,918 in 2016. Also, since 2016 Nigeria added Hepatitis B and hepatitis C screening to its services, this was further activated in the 2019 and the 2020 program. The 2020 program was able to record about 140,000 attendance while the June 2022 program had 49,891 registrants. This low figure is associated with the available fund for the program versus the number of days employed to activate the program which was two as against the regular two days

Acceptance of the program has increased tremendously over the past eleven years due to much publicity given to it through our robust working relationship with and great work with public relations consultant, Core Prime Ad Concept and other local Public Relations organizations with increased materials and logistics support from our key program partners especially the Nigeria Federal Ministry of Health and the US Government missions under the PEPFAR program. The support from the Federal ministry of Health has been very beneficial to the RFHD program as it signifies official acceptance of RFHD as one of the important health programs in Nigeria. The Federal Ministry officially send information and directives to State Ministries of Health and the Primary HealthCare Centres all over the country to work with Rotary on the RFHD as they do during polio, malaria and other health programs which Rotary spearheads. The US Centers for Disease Prevention and Control and the USAID give adequate information, logistics support and request their Implementing Partners to work with RFHA on its RFHD sites.

Funding for the February 2023 program came fully from The Bill and Melinda Gate Foundation. No other organization funded the program. Notwithstanding there were supports from The Federal Government of Nigeria and most State Governments where the program took place, Local governments and local NGOs that supported in kinds especially through human capital

The proof of concept and sustainability of the program has long been established. The Rotary Foundation of Rotary International regularly send members of the Cadre of Technical Advisers to audit the various yearly program. The last sent being in 2020. The audit was conducted virtually spanning a period of one week. The Auditor was able to speak with key role participants in the program and had no known reservation about the program. His report was duly submitted to the Rotary Foundation of Rotary International.

Background

Rotarians for Family Health and Aids Prevention Inc. (RFHA)

Rotarians for Family Health & AIDS Prevention (RFHA) is a global Rotarian Action Group and mobilizing partner of Rotary International. RFHA creates the design, obtains the resources and has overall management responsibility for Rotary-led disease prevention programmes such as the Rotary Family Health Days. RFHA's mission is to save and improve the lives of children and families who lack access to preventative health care and education through the mobilization of Rotarians and Global Partners. RFHA's direct impact is the **strengthening of infrastructure on health care delivery systems** worldwide.

RFHA's role in the program is to act as the lynchpin organization, to initiate the program, obtain partner organizations and funding sources, and to coordinate the work with all implementing partners leading up to and over the three-day event. RFHA further provides mechanisms, tools, platforms and training to assist the four Rotary Districts and numerous Clubs in Nigerian to roll out the RFHD Program as well as develop a comprehensive Media and Communications strategy delivered through a dedicated Media Team. This was done successfully over the years and are continually building upon.

Rotary Family Health Days: A Public Private Partnership

An Historical background

The Rotary Family Health Days is the signature programme of the Rotarian Action Group, Rotarians for Family Health & AIDS Prevention Inc (RFHA). It is a unique public/private partnership program that is currently in its tenth year of operation. This three day annual program provides wholistic, comprehensives and preventive health screenings (both communicable and non-communicable) diseases by way of leveraging and inspiring a massive force of humanitarian-driven Rotarians and partners. Through this programme, tens of thousands of people are served in mostly under-privileged communities in some countries in East Africa, South Africa, West Africa and India.

The services include free life-long immunizations to children, such as polio and measles vaccines and comprehensive life-saving annual health screens, counselling, testing and referrals for HIV/AIDS, TB, diabetes, hypertension, malaria, and some cancers. They also include deworming of children, vitamin A supplementation administration and immunizations for polio. Other services like eye and dental examinations are included at almost all locations. Health counselling, education and referrals for follow-on care are provided as well. Distribution of insecticide treated mosquito nets, male and

female condoms, hygiene packs, dental cleaning supplies and other materials are also offered to clients in areas of need and availability.

In 2018 this three-day campaign operated about 500 health camps through the efforts of over 400 Rotary Clubs and 5,000+ Rotarians, Rotaractors, and community volunteers. The sites were located across Nigeria, South Africa, Ghana, Cote d'Ivoire, Togo, Benin, and Uganda. Services were delivered to 423,795 patients. Since the inception of the Rotary Family Health Days in 2011 over 2.4 million patients have been offered over 11 million free health services.

In Nigeria the program is Rotary-led together with our valued partners which include the Nigeria Federal Ministry of Health, the four Rotary Districts in Nigeria, local NGOs, our media partners and the Measurement and Evaluation partners, Zimi Community Good Health Initiative, etc.

The February 2023 RFHD Programme was fully funded by the Bill and Melinda Gates Foundation and supported by The Federal Ministry of Health, States Ministries of Health, Primary Health Centres, Local NGOs, We also had huge technical support from RFHA inc. They all provided personnel and material support.

RFHD Programme Model Nigeria

Primary Partners

- Rotary Family Health and Aids Prevention (RFHA) – a Rotary International Action Group
- Bill and Melinda Gates Foundation – Main funder
- Nigerian Federal Ministry of Health
- States Primary Health Centre
- Local NGOs

THE FEBRUARY 2023 HEALTH DAYS

The February 2023 Rotary Family Health days was the second in the series of direct funding from The Bill and Melinda Gates Foundation. This mode of funding was coming for the second time in the history of the program. The planning and execution however took largely similar strategy as previous programs. Regardless of this, there was special dedication and concentration of vaccination of children against polio. The team had to work with the Nigerian National Polio Plus Committee who supported with ideas to beef up with our resources. The team also had to work specially with the Federal Ministry of Health and various States Ministry of Health, pulling direct support from the department on vaccination. The program also gave consideration to Covid test and vaccination. The

demand for COVID-19 pandemic related items had to be included in the list of items purchased and distributed. In planning therefore, the planning of the February 2023 Rotary Family Health Days across Nigeria could be said to have commenced few weeks after the execution of the October 2022 edition. The National Planning Committee held series of meetings with various partners, meeting of National Steering committee comprising District coordinators, Team Leads, Field workers , Local Authority leaders, Government personnel at various levels, local, State and National. We also communicated with all the District Governors and got their buy-in for the program. The Governors had earlier nominated their District Representatives and working with them did not pose any challenge.

We had two prominent official launch, one in Lagos and the other at Port Harcourt, Rivers State. At both launch with had the privilege of having the presence of the District Governor Elect (in District 9110) and District governor (District 9141) Both also had the presence of Past District Governors, Government officials numerous Rotarians, Partners and members of the Press. Others present includes RFHA Director, PDG Jide Akeredolu, (District 9110), Nigeria and Rotaractors, members of the Press, government officials and partners.

Both launch events were quite successful and were able to meet the goals of the launch which essentially was to create further awareness for the programme within the local people and the world at large. The press interviewed key participants and publicized same in the National Newspapers, The National Television and National and Local Radio stations

The meetings with the Federal and State Ministry of Health and local Primary Health centres were scheduled early.

Unlike recent previous events, funding came early enough to afford better planning. This also afforded the removal of periodic pressure on the program management team especially with suppliers and vendors of medical supplies and other materials.

As a result, all supplies were centrally procured by the Central Planning Committee to ensure the quality and standard of supplies and they were dispatched to the various Rotary district coordinators through private dispatch services.

COORDINATING TEAMS

The following committees were set up for effective coordination of the February 2023 Rotary Family Health Days at the national, district, state and club levels:

- 1. National Steering Committee**

consisting of RFHA Nigeria Officers. This includes The National Coordinator, Technical Advisor, Project Advisor, District Coordinators and Assistant District Coordinators. It has a responsibility of planning, coordinating, budgeting and strategic oversight duties over all the

four Districts in the country. The Committee set overall policies, approves administrative and financial plans and liaison with national partners and cooperating organizations.

2. District Steering Committee

Members are appointed by District Governors. They are responsible for the coordination and implementation of the program in their Rotary district geographical areas. They approve club Needs Assessment exercise, the selection of sites, and relate to local partners. They work with selected area, regional and state focal persons. The committees prepare and send program report to the national committee and gives their support during the 90-day impact study exercise.

3. Club RFHD Committee

A minimum of a 3-member committee is set up in each Rotary Club across the country and especially in participation clubs. They directly secure suitable sites with advice of local government health departments. They also coordinate program implementation at sites, seek volunteers, work with them and communicate with the district committee and report to the Club and the District Coordinators.

DETERMINING THE DATE

The national steering committee members selects possible dates based on the availability of the date and its convenience to all the Districts. Thus the inputs of the District Governors was necessary in the course of selecting the appropriate dates. In the past, RFHA normally reminds them of the usual month of RFHD which for about 5 years has been third quarter of the year except for the June 2022 edition, based on prevailing climate, National events, District Governors' itinerary and other Rotary programmes. The Federal and State Ministries of Health gives us a free hand to pick a date but give long information to facilitate strong participation of government agencies in the programme. The February 2023 date was amongst others determined bearing the National Election in the country scheduled for fourth week in February and second week in March 2023. The date therefore was strategically fixed for 2nd-4th February 2023, thus to be held, weeks before the proposed National elections.

SITES DETERMINATION

As many clubs desires to be involved, they find avenues to involve the people in their communities and new communities they have not explored in the past. The Rotary Clubs are the local people that deals directly with the people. They conduct Needs Assessments of their geographical areas. Reports are collated and discussed by all the committees set up and agreement is reached on how many sites will operate in the exact locations. Factors considered include medical gaps, needs, performance in previous years within that location, community assets, level of Rotarian involvement. The local government health departments, State ministries of Health, CDC and the USAID also provide lists of locations which service must be taken to and the areas each of them

actually works. The locations are finalized with our partners as they offer valuable logistics and personnel support. Effectively, there were a total of One Hundred and Ten (110) approved sites for the February 2023 program.

Project Goals

The goals of the programme are multi-faceted and they are broken down as follow:

- To organize a 3-day general medical outreach in various locations of the country through Rotary Clubs and private organizations who desires to partner with RFHA
- To test, immunize , counsel, and refer clients to where they can get appropriate medical treatment
- To raise awareness for polio immunization and immunize children of age zero to 5 years.
- To increase the number of people who know their HIV status,
- To increase the overall number of people exposed to various other diseases like Prostate Cancer, Tuberculosis, breast Cancer, malaria, typhoid, etc.
- To give support and boost both prevention and treatment and offer other family health related services.
- To educate people on the various health challenges that as may be offered at different locations

Project Objectives

The February 2023 programme is the second of its kind where funding is wholly out of Rotary, the Central Planning team had to adjust its regular objectives slightly to advance the area of focus of the new Partner which is Polio immunization. Effectively the objectives of the program are as follows:

- To sensitize, mobilize and effectively immunize children of ages zero to five years
- To proactively sensitize, mobilize and engage the community to ensure significant participation in the HIV counseling and testing
- Test and counsel about 100,000people
- Set up at least 100 sites for the tests and screening
- Offer information and related materials for various diseases and conditions
- Refer clients that tested positive for appropriate care, support and treatment services
- Carry out testing and screening for other infections and diseases
- Mobilize volunteers from Rotary, Rotaract, Rotary Community Corps and communities for the events
- Seek support of RFHA's partners: USAID, CDC, the ministries of health at all three levels of government
- Create sufficient awareness in the media to showcase the work of Rotary and the Action Group in particular

Engagement with Primary Partners

1. The Federal and States Ministries of Health were intimated of the programme early enough to get them to continue their collaboration. They were requested to mobilize the community citizens to come out for the event at the various sites, permit Rotary the use of government health facilities at sites for the tests, donate consumables like condoms, test kits and deploy some nursing and technical staff for the program.
2. The RFHA National and district committees constantly work with all Rotary Clubs, Rotaractors, the Family of Rotary and Rotary Community Corps giving information, explaining the programme and mobilizing them through visits, workshops and training
3. Our media consultants prepares a viable media campaign
4. Meetings were held with major programme partners who were requested to transport the HTC services of their NGO partners to Rotary and provide other relevant support.
5. The Central Planning Committee has engaged the services of an M&E Consultant, ZIMI Community Good Health Initiative. As a cooperating partner they support with their wealth of professionalism and the various committees worked with the organization to achieve our goals
6. In support for awareness and bigger publicity, Radio and Television jingles, Fliers, posters and various communication materials were supplied by various government and primary health centers.

Training

The Central Planning committee planned six training sessions which were held across the country for key participants including, Rotarians, Rotaractors, health workers and other volunteers. The syllabuses dealt with general health issues, data collection, testing/screening techniques, correct use of treated nets and sanitary towels, general hygiene, what is expected of volunteers at the site itself, what clubs must provide to augment what the Central Planning Committee is providing, methods of public image and awareness, health and safety of workers and clients, confidentiality in results, etc. Facilitators included Rotarians, both government and private medical experts, our consulting staff and RFHA committee members.

The best use of the designed forms for data capturing was extensively discussed.

Programme Partner Organizations

As a result of the successes of the past, the Action Group has grown in fame and more organizations are confident in dealing with us. In the program under review the following partners collaborated with us

- Centers for Disease Control (CDC)
- USAID
- Federal Ministry of Health
- Numerous States Ministry of Health
- Local NGOs
- Faith-based organizations
 - Catholic Church
 - Muslims organization
 - Faith Evangelist
 - Grailland Movement
- Planned Parenthood Federation of Nigeria
- National Malaria Control Programme
- National Primary Healthcare Development Agency
- The Eye Foundation
- AHF
- Power Oil
- Life Agenda
- OASIS Foundation
- Sure Dental Clinic
- University of Uyo Teaching Hospital
- Olabisi Onabanjo University Teaching Hospital
- Sebecly Cancer Care Foundation
- Amazing Care Foundation
- Health Matters Incorporation
- Hepatitis Zero (a Rotary Action Group)

Media strategic plan and campaign

We had a very robust media plan in collaboration with our media partner, Core Prime Ad-Concept. Our media partner organized a nationwide coverage of the programme from various sites and helped with two media interactions in Lagos State for the national launch programme. The National launch event took place in Lagos and had in attendance representatives of the minister of health,

Rotary and community leaders and our key partners. The event was covered by the National Television station and International Local Televisions like Africa Independent Television, TVC and the Channels TV, national newspapers and radio stations. There were Television interviews and Radio talk sessions at various states of the federation during the activation. Other publicity campaigns includes:

- Radio jingles in colloquia English and three major local languages, Hausa, Igbo and Yoruba, radio announcements and interviews
- Pre and post event press interviews and newsreels
- Awareness campaigns in town and cities at community gatherings, markets, schools and worship centers
- Social media campaign like the Facebook and WhatsApp platforms
- Distribution of flyers, posters and banners
- Notifications and announcements in Rotary bulletins and speaking at Rotary events like Clubs President Installation, Clubs events etc.

Specifically, we utilized the following media:

PRINT:

The Guardian,
Punch newspapers
The Nation

ELECTRONIC:

The National Television Networks
Lagos television
Africa Independent Television
TV Continental

RADIO:

Radio Nigeria
Bond FM
Eko FM
Paramount FM
Dugba FM
Kaduna FM
Asaba FM

Wazobia FM

Monitoring and Evaluation

Relevant data were collected on sites by volunteers, especially health workers from our NGO partners, Rotarians and Rotaractors. The records are being analyzed for use during the 90-day Impact Study/ Exit exercise which will be conducted in May / June 2023. The exercise is planned to be conducted by our M&E consultant, ZIMI Community Good Health Initiative with support of the RFHA M & E Team. It will cover areas in all the Rotary Districts. When the report is received, it would be shared with all parties.

AGE DISTRIBUTION

TOTALS	383,363	288,362	43,438	111,297	826,460

Add-On Services Provided

* Intervention at two Internally Displaced People's Camps	7,443
* Intervention at Correctional homes	6,752
* General body analysis/checks	8,000
* Nutritional education	27,397
* Distribution of "mama kits" to pregnant women	5,420
* Eye Tests	15,823
* Reading glasses	4,065
* Toothpaste	650
* Weight check	54,700

Service Referrals Provided

HIV Test	9
Hepatitis B	13
Hepatitis C	0
Blood Glucose	117
Eye Screening	35
Dental Care	122
Breast Cancer Screening	4
Cervical Cancer Screening	1
Prostate Cancer Screening	16
Malaria Tests	238
Blood Pressure Tests	984

--	--

Observations, Challenges and Key Learnings

RFHA Nigeria requested from certain NGOs. The NGO partners came and were very active in providing counselling, testing, screening and supply of materials to various sites.

- The Federal Ministry of Health supported the program with supplies of thousands of male and female condoms, malaria Rapid Diagnostic Testing kits, IEC materials and some insecticide treated mosquito nets. It also provided facilities/ materials for polio immunization, HIV testing and Hepatitis screening.
- Most of the States ministry of Health also gave logistics and personnel support through their Primary Health Care centers
- The Society for Family Health gave support towards malaria screening
- The Planned Parenthood Federation of Nigeria performed the screening for cancers
- We received huge media support from RFHA Inc. This helped in no small measure to enhance our social media presence. The tool employed, that is Givefinder was of great support. We hope to receive more of this support in subsequent programs.
- For Monitoring and Evaluation, the support of RHFA Inc should be mentioned. Team supported in the design of training tools and data capture.
- The All Rotary International District Governors gave the RFHD generous support and ample opportunities to speak at their district events, seminars and major programs
- As a result of the program we have received some requests by members of the communities to volunteer in the program and or enquiries on how to join Rotary . This is good news to Rotary and they are being followed up

Challenges

- Perhaps the greatest challenge encountered in this particular program is the fact that it fell in the month of National Presidential election. Whereas it did not affect the execution directly, it affected our planning and reporting adversely. The Government had withdrawn currency from the system nationwide. The economy is still heavily cash based and as such most supplies and deliveries got affected directly. At point of collating reports also , we could not get our reports collated from the field as quickly as we desired as most

people were involved physically and emotionally in the elections, thus they abandoned the reports and faced the national election affecting them and their communities directly.

- The same election had made bank transactions difficult in all parts of the country without exemption. All banks in the country could not make transactions smoothly without electronic truncations and stoppages and returns. The faith in the banking system was reduced and this made transactions slow, the ease of doing business in the country and slow transactional ways strongly posed huge challenges.

- Whereas the funding arrived in good time, the inflationary trend in the country reduced our supplies, this some worth reduced our supplies and deliverables to the communities. We were however able to surmount this through donations from clubs and some organizations

- Accessing some rural areas continue to pose great challenges, coupled with the current insecurity at such places. This highly affected our performance in such areas. It also strongly affected our collation of data and reports

- The Nigerian erratic electric power supply is still a major challenge as this greatly affects internet operation in rural areas and convenience of partners

- The program ran for only three days but service providers usually get overwhelmed during the last day of event and the crowd usually builds up then.

Conclusion

Regardless of the pockets of challenges encountered, the February 2023 program was a huge success. The Central Planning committee members were eventually satisfied that the Rotary Family Health Days had again been restored in the communities. It turned out to have attracted more awareness and acceptance.

As usual, the program turned out to be a great experience both for Rotarians and the public we serve. Not minding the time and other resources put into it, the team was determined to make it an excellent program that it turned out to be.

Effectively,

- We achieved most of the goals of the program.
- Some clients were able to get referrals for medical follow-on, treatments and care.
- Awareness of the program has been generated more than previously and more access has been made as a result of this particular program

- Clients at various communities are in dire need of our services as it is helping them in knowing their health status which in turn has reduced the health anxieties and the cost of keeping healthy and encouraged lifestyle changes
- Rotary awareness in some communities was increased and in some an affirmation of Rotary's good deeds in the community.
- Participating Rotarians felt fulfilled to be part of the program
- As a result of the program some members of some communities are now attending Rotary meetings with a view to becoming members.

Recommendations

Following the demand by the community members we will like to recommend that

1. The next program be approved for the third week of June 2023
2. The Funding be released not later than third week of May 2023 to enable us have clear one month to plan and get prepared for the June edition.
3. The funding be increased by about 20% to cushion the current inflationary trend in the country which has affected all line items of our medical supplies and cost of administration.

Appreciation

We wish to appreciate specially the effort of Senior Programs' Officer at Bill and Melinda Gates Foundation (Andrea Thompson) for her support and believe in our activities. We recognize also the astuteness of The RFHA CEO, Susan Paget and her leadership style of coordination and motivation. All participants and recipients in Nigerians are very grateful to the RFHA Inc. Board for giving us the opportunity to serve the various people in our communities through the Rotary Family Health Days Program. We appreciate the support of the various four District Governors in Nigeria in whose districts we were able to execute the health Days.
